BIOZYME [®] TF	POLIQUEL MULTI [®]	OPTIMAT [®]	BIOGIB [®]	
	POLIQUEL ZINC [®]			
	POLIQUEL BORO [®]			
	POLIQUEL CALCIO [®]			
	POLIQUEL HIERRO [®]			

The diagram illustrates the growth stages of sugarcane from left to right: **Brotación** (germination), **Macollaje** (tillering), **Cierre** (closure), **Período de Gran Crecimiento** (Great Growth Period), and **Maduración** (maturation). A yellow box labeled "Determinación del rendimiento cultural" (Cultural yield determination) is positioned over the Great Growth Period. Vertical dashed lines separate the stages, and a blue arrow points to the "Cierre" stage.
