Potato pronutiva[®]

Crop Protection + BioSolutions

For high marketable yields on your potatoes

Water Absorber

Soil Conditioner

Pilatus[®]

Bio-Root Stimulant

Biozyme[®]

Flowering Bio Stimulant

Blight Control

What is Pronutiva?

ProNutiva® is an exclusive program that integrates natural biosolutions (bioprotection, biostimulants and bionutrition) with conventional crop protection products to meet or exceed the real-world needs of today's growers. The integration of biosolutions with conventional plant protection products answers the latest challenges in agriculture by:

- Supporting sustainable agricultural practices
- Improving grower economics
- Meeting evolving food chain requirements

A ProNutiva program is intended to cover plant needs throughout the season or at specific development stage of the crop.

REON™

REON is a Revolutionary patented starch-based, Super Hydrating Granule Absorbs 450 times water volume. It Holds leaching of nutrients and Releases water based on requirement of the plant

BENEFITS

- Increases the water holding capacity of soils
- Reduces leaching of key nutrients
- Maintains a level of moisture in the applied root zone
- Supports soil microbial communities

RATE PER HECTARE
5kg/acre OR 12kg/Ha

Panoramix-GR
Soil Probiotics

Panoramix-GR is a 100% natural product based on beneficial microorganisms for use in production of various agricultural crops.

BENEFITS

- Boosts plants resistant to drought
- Promotes growth for stronger plants
- Natural and safe for people & the environment
- Increased crop nutrition value
- Promotes root growth

RATE PER HECTARE
3kg/acre OR 7.5kg/Ha

Pilatus®

Pilatus is a Starter Biostimulant

BENEFITS

- Promotes good root system establishment
- Promotes maximum nutrient absorption
- Root rejuvenation of perennial crops
- Promotes good root system establishment
- Promotes maximum nutrient absorption
- Root rejuvenation of perennial crops

RATE PER HECTARE
Drench: 1-2ltr/Ha

Biozyme®

Biozyme is a Fruit and Flower Biostimulant

BENEFITS

- Formation of many flowers & early flowering
- Maximum fruit-set
- Fruit uniformity 7 high quality yields
- Extended production
- Reduces plant stress

RATE PER HECTARE
Foliarspray: 1ltr/Ha

VONDOZEB®

Unique formulation fungicide for highly effective control of blight and other fungal disease in vegetables, fruits, field crops and ornamentals.

BENEFITS

- Special formulation with no dust hence safe in handling.
- Easy to measure - flows like a liquid.
- Easily disperses in water, no agitation required
- Excellent coverage of foliage for better disease control.

RATE PER HECTARE
1kg/acre OR 2.5kg/Ha
