

VIGILANT® ATTACKS MITES AT ALL LIFE STAGES, ALL SEASON LONG.

Get outstanding protection from spider mites at all stages with VIGILANT® Miticide. Ideal for almonds, walnuts, strawberries, grapes and many other crops, VIGILANT has a short pre-harvest interval — one day for strawberries, seven days for almonds and 14 days for grapes and all other tree nuts — and a reputation for going easy on predator mites and beneficial insects. For most crops and programs, it can be used throughout the season whenever spider mites are present and populations begin to build, offering a solution that seamlessly fits within the framework of your integrated pest management regimen.

ACTIVE INGREDIENT

Bifenazate

FEATURES & BENEFITS

- Fast knockdown; kills motile mites and eggs on contact
- Long residual control
- Attacks spider mites at all life stages
- Easy on predator mites and other beneficial insects
- Short PHI
- No known cross-resistance
- Ideal for IPM and resistance management programs
- Good rotational partner
